CAP Comcast Petition

To Philadelphia City Council and the Mayor:

Everyone in Philadelphia deserves access to great public schools, fast and affordable internet and cable, and competition to drive prices down and quality up. We can't afford to have Comcast overcharge us and under serve our communities any more. As the city renegotiates its cable franchise agreement, now is our time to get what we need from Comcast: funding for public schools and services, expansion of fast and affordable internet and cable, and meaningful competition in our communications market.
